To the people of the FCC, I am the wife of an otr driver. My husband has been an otr since 1977. It is not an easy job with just the every day problems. The satellite radio has been more help than anyone who does not have this kind of job could realize. Not only are they able to get the kind of entertainment that they want ( which helps their day go better) but the info that they need. Its hard enough getting threw a city or any high traffic place with out having to find the station for that city to find out what is going on there. Please please , reject petition 04-160 and help keep my husband safe for me he's all i have

Respectfully Yours      Geneva Morrison
